Stretch Films

Highly transparent film with excellent elongation, stress retention and puncture resistant

Stretch film is an elastic polyethylene film, also called pallet stretch film. This film is used extensively for packing and securing loads stacked on pallets. This ensures that the goods are given ample protection from rain and dust. It also helps prevents the goods shifting during transit thus reducing damage to the goods.

Surface Protection Film

Total protection from unnecessary stains, abrasions, or scratches

RMCL has created a protection film made from LDPE film with an ultra-low tack adhesion for removable ease. The film has good rub resistance, no adhesive residual, light tensile strength and excellent bonding effect. Most of the uses of this material are for smooth and glossy surfaces. It offers good surface protection during fabrication, transportation, and installation process.

Vacuum bags

RMCL manufactures a range of different sizes of vacuum bags made from of PE and nylon which gives an excellent barrier property. These bags are mildew proof, insect and moisture proof. When sealed, the bags can decrease in size by up to 10 times and are suitable for packing fibre, medicine, bulk packing as well as domestic items.

Edge Protectors

The smart choice for excellent protection and load stabilization

RMCL offers a wide range of high quality and precision finished edge protectors built to ensure complete protection and proven dependability. These are made by laminating recycled paperboard into a rigid right-angle shape. They are extremely sturdy and provide load containment, protection, stabilization and strengthening.

Thermal Lamination Film

Tailor made structures with excellent barrier properties

RMCL offers Thermal Lamination film which has today become a very convenient option to various converters. It is in fact considered to be most suitable for flexible packaging of food materials. What is attractive about it is that, tailor made structures can be made available to suit every customer's individual requirements.
